ORGANIC FRESH

What it is

An organic bioshield made with citrus bioflavonoids and organic acids. It keeps grow rooms, tents, greenhouses, tools and equipment clean, so plants can just grow.

Non-corrosive, biodegradable, won’t damage equipment.

ORGANIC FRESH

Fogging and spraying

Shake well before use.

Humidifier / fogger bioshield

0.5 mL per litre

about 1.9 mL per US gallon

Add to humidifier water.

Disinfection spray, tools, room reset

3 mL per litre

about 11 mL per US gallon

Spray to full cover, let air dry.

ORGANIC FRESH

Harvest and irrigation

Shake well before use.

Pre-harvest spray

3 mL per litre

about 11 mL per US gallon

Spray at end of crop, let dry, then cut and hang. Helps protect terpenes and trichomes and helps extend shelf life.

Irrigation line clean

1 mL per litre

about 3.8 mL per US gallon

Soak, then drain. Do not flush with water.

ORGANIC FRESH

Outbreaks and tools

Shake well before use.

Major outbreak

UP TO

10 mL per litre

about 38 mL per US gallon

Spray to full cover, let air dry.

Scissor soak

Undiluted

concentrate, not mixed

Soak blades in undiluted concentrate in a glass to lift resin and residue.

ORGANIC FRESH

Mixing guide

mL of Organic Fresh to add

Water	Fogger 0.5 mL/L	Spray 3 mL/L	Line 1 mL/L	Outbreak 10 mL/L
1 litre	0.5	3	1	10
5 litres	2.5	15	5	50
10 litres	5	30	10	100
US gallons (amounts are approximate)				
1 US gal (3.8 L)	1.9	11	3.8	38
5 US gal (18.9 L)	9.5	57	19	189
10 US gal (37.9 L)	19	114	38	379

Shake well before use.

Spray: disinfection and pre-harvest. Line: irrigation line clean. Outbreak: up to 10 mL per litre.

1 US gallon = 3.785 litres. 1 fl oz = 29.6 mL.

ORGANIC FRESH

Sizes

15 mL tincture

15 mL (0.5 fl oz)

Makes about 5 L / 1.3 US gal of spray at 3 mL per litre

Pint concentrate

16 fl oz / 473 mL

With a transfer funnel

Quart concentrate

32 fl oz / 946 mL

With a graduated beaker
